

Service Line Inventory Form for Public Water Systems

What is the purpose of this template?

This template is required for community and non-transient non-community public water systems to comply with the service line inventory requirements of the January 15, 2021, Lead and Copper Rule Revisions (LCRR). This template provides fillable forms and tables for public water systems (systems) to document their methods, organize their inventory, submit the initial inventory and inventory updates electronically to the TCEQ, and document how they are making the inventory publicly available. Refer to the Lead and Copper Rule Revisions rule language in 40 CFR § 141 Subpart I and the EPA's Guidance for Developing and Maintaining a Service Line Inventory for minimum LCRR requirements and recommendations.

For questions, please contact LCRR@tceq.texas.gov or call (512) 239-4691. The financial, managerial, and technical (FMT) assistance program can provide additional assistance and can be reached (512) 239-4691 or FMT@tceq.texas.gov.

Submit the completed lead service line inventory electronically. For file sizes larger than 25 megabytes (MB), the TCEQ File Transfer Protocol Secure (FTPS) site is available at https://ftps.tceq.texas.gov/index.php.

How is the template organized?	
The worksheets in this template are color coded:	The cells in this template are also color coded:
Yellow worksheets are instructions and background.	Gray cells are background or instructions.
Dark blue worksheets are templates for systems.	Light blue cells are fillable cells for systems.
	Aqua cells are required.
	X Required cells are further denoted using a superscript x.
See the table below for a description of each worksheet.	Conditionally required are denoted using a superscript [‡] .

Template Organization		
Worksheet Type	Worksheet Name	Description
	Template Instructions	Contains detailed instructions for systems.
Background	Classifying SLs	Summarizes requirements for classifying the entire service line (SL) when ownership is
	Classifying 3Ls	split (i.e., when the system owns a portion and the customer owns a portion).
	PWS Information	For systems to document basic system information.
	Inventory Methods	For systems to document the methods and resources they used to develop and update
	ilivelitory ivietilous	the inventory.
		For systems to provide a summary of their service line inventory, including information
		on ownership, inventory format, and the number of service lines for each of the four

System Template Instructions Purpose of this worksheet: To provide detailed instructions for each worksheet for systems.

Getting Started

- 1. Save a copy of this workbook to your hard drive or network drive. Consider adding the system PWS ID or other system identifier to the file name (e.g., Inventory Template_TX0000000) and indicating in the file name if this is the "initial" inventory or "update1", "update2", etc.
- 2. Complete the PWS Information, Inventory Methods, Inventory Summary, Public Accessibility **Documentation**, and **Certification** worksheets by following the instructions below.
- follow the instructions below. 4. Certify completion of the lead service line inventory by using the **Certification** worksheet and following the instructions below.

3. Use the **Detailed Inventory** worksheet in this workbook to organize information on service line material,

- 5. When all relevant worksheets have been completed, submit this file electronically to the TCEQ.
- **PWS Information Worksheet Purpose:** Required worksheet for systems to document basic system information.

comprise at least 20% of the structures you serve", select from the dropdown list the appropriate response. When entered, the PWS name and PWS ID will auto-populate into all other worksheets. System type and multi-family residence info provided will be utilized in the Detailed Inventory for the Sample Site Selection Tiering (column Y).

Directions: Include information about the system, contact information, and the individual who prepared the inventory by completing the light blue cells. For the question regarding the public water system (PWS) type, select the appropriate type from the drop-down menu; select CWS for community water system or NTNC for non-transient non community water system. For the question "if a CWS, do multi-family residence

- TCEQ-20943 (Rev. 12/1/2022)
- Inventory Methods Worksheet **Purpose:** Required worksheet for systems to document the methods and resources they used to develop and

update their inventory.

The information for PWS name and PWS ID in rows 3 and 4 will autofill from information provided in the **PWS Information** worksheet.

Part 1: Historical Records Review. Describe the records reviewed for the inventory for each of the five

its inputs.

Directions:

types of records that must be reviewed under the EPA LCRR. Document other records reviewed in section 5. Refer to the examples provided in Column B and EPA's Guidance for Developing and Maintaining a Service Line Inventory for additional information. For each historical record type, select "Yes" or "No" to indicate if

service line material information. If the "other" method option is selected, explain in the space below the question. Question 2: Use the dropdown menu to indicate if standard operating procedures were developed or revised for identifying service line materials. If "yes" is selected, include a description in the space below the question.

Question 1: Check each box that indicates during which normal operating activities the system collects

"other" is selected, explain in the space below the question.

the record type was reviewed as required by 40 § CFR 141.84(a)(3).

Part 2: Identifying Service Line Material During Normal Operation.

TCEQ-20943 (Rev. 12/1/2022)

Question 2: If the system used "Predictive Modeling", provide a written explanation of the method and

Inventory Summary Worksheet Purpose: Required worksheet for systems to provide a summary of their service line inventory, including information on ownership, format, and the number of service lines for each of the four required materials

The information for PWS name and PWS ID in rows 3 and 4 will autofill from information provided in the PWS Information worksheet.

Part 1: General Information.

 Question 2a: Use the dropdown menu to indicate who owns the service line. If "Other", describe in the space below the question. For systems that indicate that the entire service line is owned by the PWS from the dropdown menu, the Detailed Inventory will be updated to not require information on the customer-owned portion of

Question 1: Use the dropdown menu to indicate if this is an initial inventory or an inventory update.

the state or local ordinance that banned their use.

the service line.

Question 3a: Describe when the lead service lines were generally installed in your system.

Question 3b: Describe when the lead service lines were banned in your system including a reference to

Question 4: Use the dropdown menu to indicate if you have any lead connectors in your system. For example, a lead gooseneck or pigtail that connects the service line to the water main. If you are unsure,

- select "Don't Know." TCEQ-20943 (Rev. 12/1/2022)
- number of service lines for each of the four material classifications in Table 1 of the Inventory Summary worksheet. Note that the calculation starts on row 13 of the Detailed Inventory worksheet. Rows 13 through 20 are provided as examples; in order for the Inventory Summary counts to accurately reflect the system inventory, the examples will need to be deleted. Refer to definitions provided as part of the summary table and the Classifying SLs worksheet for additional guidance on assigning a materials

Systems must track the system-owned and customer-owned portions separately in their inventory

unless the PWS maintains ownership over the entire service line.

Additional Information to Assign Tap Monitoring Tiering

lead service lines with only a lead gooseneck or pigtail as lead service lines.

Part 2: Inventory Summary Table.

TCEQ-20943 (Rev. 12/1/2022) Detailed Summary Worksheet **Purpose:** To provide a format for systems can use to track materials for each service line in their distribution system. General Instructions: Each row in this worksheet represents one service line connecting the water main to

required fields are denoted by superscript indicators. As explained in more detail below, entries for each field can either be selected from a dropdown menu or will require manual entry. Nine examples with a range of available data are provided for reference.

Lead Service Line Replacement (LSLR)

Location Information

Columns with agua shading are required by the EPA LCRR. Additionally, all required or conditionally

• Column C - Street Number: This field is required. Enter the actual street location address (street number) of the service line. Do not enter the billing address that may be a location other than the service address.

• Column D - Street Name: This field is required. Enter the actual street location address (street name) of the service line. Do not enter the billing address that may be a location other than the service address.

• Column E - City: This field is required. Enter the City of the street location address of the service line. Column F - Zip Code: This field is required. Enter the Zip Code of the street location address of the • Column G - Other Location Identifier: This field is conditionally required. Include a non-address location

identifier (e.g., block, intersection, landmark, or water meter) for each service line.

field should be positive values for Texas. It is recommended to include 5 decimal places.

- field should be negative values for Texas. It is recommended to include 5 decimal places.
- Column K If Non-Lead, was Material Ever Previously Lead?: This field is conditionally required if the System-Owned Portion Service Line Material Classification (Column J) was marked as a Non-Lead option.

determining if a downstream/customer-owned galvanized service line requires replacement and will affect

• Column L - Service Line Installation Date?: This field is conditionally required if the System-Owned Portion Service Line Material Classification (Column J) was marked as a Non-Lead option. Use the dropdown

• Column M - Notes: Use this column to provide any additional information, such as additional details about the basis of material classification, additional information on the field verification method, or

Use the dropdown menu to select "Yes", "No", or "Don't know". This information is important for

menu to enter the estimated date range when the service line was installed or replaced.

to enter the estimated date range when the service line was installed or replaced.

service lines in each of the four categories based on the entries in this column.

main to the service line.

tiering classification as follows:

sites, in that order.

TCEQ-20943 (Rev. 1/30/2022)

PWS Information worksheet.

Entire Service Line Material Classification

- Column Q Entire Service Line Material Classification: This field is required. This field will be autogenerated for each lead service line row depending on entries added for the system-owned portion and customer-owned portion section. Refer to Classifying SLs worksheet for guidance on how the material for
- dropdown menu to indicate if there is lead solder in the service line. Column T - Describe Other Fittings and Equipment Connected to the Service Line that Contain Lead: Include any other lead-containing fittings and equipment that are connected to the service line, such as backflow preventers and/or meters.

Columns U through Y are for documenting additional information that is helpful in assigning a tap sample

 Column U - Building Type Connected to the Service Line: Use the dropdown menu to indicate if the building type connected to the service line is single family, multiple family residence, building or other.

Before July 1, 1998: Use the dropdown menu to indicate if lead solder pre-dates the state's lead ban. • Column X - Current LCR Sampling Site?: Use the dropdown menu to indicate if you have identified this location as a sampling site for lead and copper tap sampling.

• Column Y - Sample Site Selection Criteria (Site Tier): This field will be auto-generated for each lead service line row depending on entries made. Systems with LSLs are required to collect samples from all LSL sites (Tier 1 and 2) unless there is an insufficient number. In those cases, the system must use Tier 3, 4, or 5

Column W - Does the Interior Building Plumbing Contain Copper Pipes with Lead Solder Installed

- Column AA Date of Customer-owned LSLR: Indicate the date the customer-owned portion of the lead service line was replaced, if applicable.
- **Directions:** The information for PWS name and PWS ID in rows 3 and 4 will autofill from information provided in the

 Question 2: Use the dropdown menu to indicate if every service line has a location identifier. If "no", explain in the space below the question. Remember that the LCRR requires systems to use a location identifier for service lines that are lead and galvanized requiring replacement. Systems may, but are not required to, include a locational identifier for lead status unknown service lines or list the exact address

- that service more than 50,000 people to provide the inventory online (40 CFR §141.84(a)(8)(ii)).
- PWS Certification **Purpose:** For systems to certify completion of the lead service line inventory.

- **Directions:**

Part 3: Service Line Investigations. Question 1: Check each box that indicates the investigative methods used to prepare your inventory. If

classifications.

ownership in your system. In the text box, include reference to any documentation that defines service line ownership in the system, such as a local ordinance, and if applicable, where ownership is split (e.g., property line, curb stop).

Question 2b: Use the dropdown list to indicate whether there is documentation that defines service line

- This summary table is for classifying and reporting material for the entire service line connecting the water main to the building inlet. When using the **Detailed Inventory** worksheet, the classifications generated in the column "Entire Service Line Material Classification" (Column Q) will be used to calculate the total
- Note that:

• A lead-lined galvanized service line is consistent with the definition of a lead service line under the LCRR

§141.2) and must therefore be classified in the inventory as a lead service line. Do not, however, count non-

("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR

classification to the entire service line when ownership is split between the system and customer.

the customer's plumbing. The worksheet is organized into seven sections: Location Information System-Owned Portion **Customer-Owned Portion** Entire Service Line Material Classification Other Potential Sources of Lead

• Column B - Unique Service Line ID: Assign a unique ID to each row that represents one service line. You can number each row starting with the number 1 and ending with the number that equals the number of service lines included in your inventory.

Page 7

Page 8

Classifying the Entire Service Line When Ownership Is Split

Purpose of this worksheet: Summarizes requirements for classifying the entire service line (SL) when ownership is split (i.e., when the system owns a portion and the customer owns a portion).

Introduction

In many cases, service line ownership is **split** meaning that the system owns a portion and the customer owns a portion of the service line. Exhibit 1 below is a diagram of a possible division in service line ownership between the water system and customer. While the LCRR requires the inventory to categorize each service line or portions of the service line where ownership is split, a single classification per service line is also needed to support various LCRR requirements, such as lead service line replacement (LSLR), tap sampling, and risk mitigation. Table 1 below indicates how to classify the material for the entire service line when ownership is split between the water system and customer. For more information refer to the Lead and Copper Rule Revisions in 40 CFR § 141 Subpart I and the EPA's Guidance for Developing and Maintaining a Service Line Inventory.

Table 1: Classification of Entire Service Line V	Vhen Ownership is Split.					
System-Owned Portion	Customer-Owned Portion	Classification for Entire Service Line				
Lead	Lead	Lead				
Lead	Galvanized	Lead				
Lead	Non-lead	Lead				
Lead	Lead Status Unknown	Lead				
Non-lead	Lead	Lead				
Lead Status Unknown	Lead	Lead				
Galvanized	Lead	Lead				
Non-lead, but system is unable to demonstrate it was not previously Lead	Galvanized	Galvanized Requiring Replacement				
Lead Status Unknown	Galvanized	Galvanized Requiring Replacement				
Non-lead and never previously lead	Non-lead, specifically galvanized pipe material	Non-lead				
Non-lead	Non-lead, material other than galvanized	Non-lead				
Lead Status Unknown	Non-lead	Lead Status Unknown				
Non-lead	Lead Status Unknown	Lead Status Unknown				
Lead Status Unknown	Lead Status Unknown	Lead Status Unknown				

Source: Modified from Exhibit 2-3 of Guidance for Developing and Maintaining a Service Line Inventory (USEPA, 2022).

PWS Information

Purpose of this worksheet: For water systems to document basic system information. All information on this page is required.

Facility Information*												
Water System Name:												
Tom Green County Fresh Water Supply District #2												
PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:

Inventory Methodology

PWS Name: Tom Green County Fresh Water Supply District #2

PWSID: 2260004

Purpose of this worksheet: For systems to document the methods and resources they used to develop and update the inventory.

Note: Cells that have a superscript * are required fields.

Part 1: Historical Records Review		
Type of Record	Describe the Records Reviewed for Your Inventory ^x	Indicate if record was reviewed as required by 40 § CFR 141.84(a)(3).*
1. Previous Materials Evaluation Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.		Select "Yes" or "No"
2. Construction Records and Plumbing Codes Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.		Select "Yes" or "No"
3. Water System Records Examples: Capital improvement plans. Standard operating procedures. Engineering standards.		Select "Yes" or "No"
4. Distribution System Inspections and Records Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.		Yes
5. Other Records		Select "Yes" or "No"

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply. **Note that under 40 § CFR 141.84(a)(5) water systems must** identify and track service line materials in the inventory as they are encountered in the course of its normal operations.

Water meter reading	Yes	Water main repair or replacement	No
Water meter repair or replacement	Yes	Water main repair or replacement	No
Service line repair or replacement	Yes	Backflow prevention device inspection	Yes
Other	No		

If "Other", please explain below:

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation? If "Yes", please explain below.

Select "Yes" or "No"

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

Yes	Water Quality Sampling - Sequential	Yes
No	Water Quality Sampling - Other	Yes
No	Mechanical Excavation	No
No	Vacuum Excavation	Yes
Yes	Predictive Modeling	No
Yes	Other	No
	No No No Yes	No Water Quality Sampling - Other No Mechanical Excavation No Vacuum Excavation Yes Predictive Modeling

If "Other", please explain below:

2. If "Predictive Modeling", please briefly describe the model and inputs used:

TCEQ-20943 (Rev. 12/1/2022) Page 1

Inventory Summary

PWS Name: Tom Green County Fresh Water Supply District #2

PWSID: 2260004

Purpose of this worksheet: For water systems to provide a summary of the service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Note: Cells that have a superscript * are required fields.

Part 1. General Information	
1. Is this the Initial Inventory or an Inventory Update? x	Initial Inventory
2a. Who owns the service lines in your system? <i>If other, please explain below.</i> ^x	Ownership is split
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).	Yes
Curb stop-meter-Curb stop	
3a. Describe when lead service lines were generally installed in your system below.	
	CI II
3b. When were lead service lines banned for the system? Reference the state or local ordinance that banned the use	e of lead in your system.
July 1,1988	
4. Are there lead goosenecks, pigtails or connectors in the system?	Don't Know

Part 2. Inventory Summary Table ¹

When using the **Detailed Inventory** worksheet, the classifications in the Column "Entire Service Line Material Classification" (Column Q) will be used to calculate the total number of service lines for each of the four material classifications below. **Remember this is the classification for the entire service line.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)				
Lead	Any portion of the service line is known to be made of lead. ²	0				
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	2				
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	260				
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	2				
	TOTAL	. 264				

Notes

TCEQ-20943 (Rev. 12/16/2022) Page 1

¹ This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do not, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines.

Detailed Inventory

PWS Name: Tom Green County Fresh Water Supply District #2

Purpose of this worksheet: To provide a format water systems can use to track materials for each service line in the distribution system.

PWSID: 2260004

General Instructions: Each row in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements; the columns with the aqua shading are required by the LCRR. The worksheet includes examples in rows 12 - 20 and is formatted for approximately 10,000 entries.

Public Accessibility Documentation

PWS Name: Tom Green County Fresh Water Supply District #2

PWSID: 2260004

Purpose of this worksheet: For systems to provide documentation to states on how public accessibility requirements of the LCRR were met. *All information on this page is required.*

Remember that the LCRR requires systems to use a location identifier for service lines that are lead and galvanized requiring replacement. Water systems may, but are not required to, include a locational identifier for lead status unknown service lines or list the exact address of each service line $(40 \text{ CFR } \S141.84(a)(8)(i)))$.

1. Select the location identifiers that you use for your service line inventory. Check all that apply.*				
Address	Yes	GPS Coordinates	No	
Street	Yes	Other	Yes	
If "Other" is Yes, please describe below:				

2. Does every service line have a location identifier? If "No", explain below.*

Yes

3. How is the inventory made publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you must provide the inventory online.*

Interactive online map	No	Printed tabular data	Select "Yes" or "No"
Static online map	Select "Yes" or "No"	Information on water utility mailings or newsletter	Select "Yes" or "No"
Online spreadsheet	Yes	Hard copy information available in water system office	Select "Yes" or "No"
Printed service line map	Yes	Other	Select "Yes" or "No"

If "Other" is Yes, please describe below:

TCEQ-20943 (Rev. 12/16/2022) Page 1

Form 20943 Created 12/2022 52

PWS Certification

PWS Name: Tom Green County Fresh Water Supply District #2

PWSID: 2260004

Certify completion of your lead service line inventory by checking the appropriate boxes below, entering your water system information, and signing the certification. All information on this page is required.

I certify	I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or
	persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate,
	and complete. I am aware that there are significant penalties for submitting false information,
	including the possibility of fines and imprisonment for knowing violations.
	As the PWS Representative, I understand that if any additional service lines are subsequently
I certify	identified as Lead, Galvanized Requiring Replacement, or Lead Status Unknown, the PWS is required
гсегију	to notify the State within 30 days of identifying the service line(s) and must prepare an updated
	inventory using Lead Service Line Inventory.
l certify	As the PWS Representative, I understand that the PWS should maintain for review any resource,
	information, or identification method used for the development of this initial inventory. These
	records do not need to be submitted to TCEQ but should be available for review.
	As the PWS representative, I understand that customers with a lead, galvanized requiring
I certify	replacement, or lead status unknown service lines should be informed within 30 days of completion
	of initial LSLI and annually thereafter until the service line is replaced.
	As the PWS representative, I understand that the PWS should provide an updated LSLI in accordance
I certify	with its tap sampling monitoring period schedule, but no more frequently than annually. The
	updated LSLI must be submitted within 30 days of the end of each tap sampling period.
Shaun Kuhn	The individual providing certification and acknowledgment to the above statements.
Shaan Kann	The individual providing certification and acknowledgment to the above statements.
